Linking Disease & Functioning

Disease

Functioning

Capturing the impact of health conditions in terms of functioning is NOT new....

- **Generic functioning measures**

- Activity of daily living (ADL) scales
 - Barthel index (1955)
 - Katz index (1957)
- Instrumental Activities of Daily Living (IADL) scales
 - Fries's Health Assessment Questionnaire (HAQ) (1980)
 - Granger's Functional Independence Measure (FIM) (1987)

- **Condition-specific functioning instruments e.g. Parkinson**

- Parkinson: Webster scale
- United Parkinson disease rating scale
- Self assessment Parkinson's disease Disability scale
- Parkinson symptom Diary
- Parkinson Disease Questionnaire (PDQ-39)

BUT they

- often do not capture functioning as multidimensional experience
- remain in a DATA SILO because they are not derived or linked and coded with an international data standard and conceptual framework.

Capturing the impact of health conditions in terms of functioning is NOT new....(cont.)

- Social medicine

- Fully structured disability evaluation e.g.
 - American Medical Association (AMA) Guides to the Evaluation of Permanent Impairment, first published in 1958 and now in its 6th edition
- Semi- or unstructured disability evaluation

BUT they

- often do not capture functioning as multidimensional experience
- remain in a DATA SILO because they are not derived or linked and coded with an international data standard and conceptual framework.

Examples of integrated documentation of Disease & Functioning data

SGB

Sozialgesetzbuch

Rehabilitation und Teilhabe
behinderter Menschen

Neuntes Buch (IX)

D. Wurde ein Auftrag auf Pflegebedürftigkeit nach dem Pflege-Versicherungs-Gesetz gestellt?

Pflegestufe

nein ja

GdB

Merkzeichen

Schwerbehinderung anerkannt

II. Klinische Anamnese

Clinical Anamnesis

Beschwerden des Versicherten (seit wann?) und Verlauf

Diabetes mell. seit Jahren bekannt. Vor 1/2 Jahr Myokardinfarkt, AHB/AR nicht durchgeführt.
Seit MI Luftnot beim Treppensteigen und langsamen Spazierengehen. Kann keine Einkaufstaschen mehr tragen. Hat seine Erkrankung noch nicht verarbeitet und ist depressiv gestimmt. Auch in der Familie zieht er sich zurück und spielt beispielsweise nicht mehr mit den Enkeln, weil es ihm zu anstrengend ist.

III. Rehabilitationsrelevante und weitere Diagnosen

1. Chronische ischämische Herzkrankheit

Diagnoses relevant
for Rehabilitation

nach ICD 10

I25.8

2. Diabetes mellitus

E11

3. Leichte depressive Episode

F32.0

Diagnose(n) Nummer(n)

ist/sind zurückzuführen auf

Arbeitsunfall, Schulunfall

sonstiger Unfall

Berufskrankheit

Gesundheitsschaden
nach dem BVG

Examples of integrated documentation of Disease & Functioning data

Vorname, Name des Versicherten: Albert Reiter Kassen-Nr. Versicherten-Nr. 61 Teil B

Verordnung von medizinischer Rehabilitation

IV. Rehabilitationsbedürftigkeit (medizinische Befunderhebung)

A. Rehabilitationsrelevante Schädigungen (ggf. Befundbögen als Anlage) **Impairments of Body Functions and Structures**
Hochgradig reduzierte linksventrikuläre Funktion (EF < 30%).

Mittelschwere Schädigung der kardiopulmonalen Funktion

Vorderwandaneurysma mit Thrombus, deshalb Marcumarisierung

Diabetes mellitus mäßig eingestellt

B. Nicht nur vorübergehende alltagsrelevante Beeinträchtigungen der Aktivitäten und/oder Teilhabe

	keine Beeinträchtigungen	Schwierigkeiten (verlangt mit Hilfsmitteln)	personelle Hilfe nötig	nicht durchführbar
Kommunikation (z. B. Sprechen, Sehen, Hören, Schreiben) Communication	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Mobilität (z. B. Wechsel Körperhaltung, Tragen, Hand- und Armgebrauch, Gehen, Treppensteigen, Laufen, Bücken) Mobility	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Selbstversorgung (z. B. Hygiene, An-/Auskleiden, Nahrungszubereitung/-aufnahme) Self-Care	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Häusliches Leben (z. B. Haushaltsführung) Domestic Life	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Interpersonelle Aktivitäten (z. B. Verhalten, Aufrechterhalten der sozialen Integration) Interpersonal interactions and relationships	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Bedeutende Lebensbereiche (z. B. Arbeit und Beschäftigung) Major Life Areas	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sonstiges				
Other Items	No restrictions	Difficulties (retarded with Auxiliary devices)	Help by person necessary	No performance possible

Aktuelle Assessment-Ergebnisse soweit vorhanden (z. B. Barthel-Index) **Ergometrie: Abbruch durch Pat. bei 50 Watt**

6-MGT: 180 m, HbA1c: 8,3 %, BMI 32 kg/m², PHQ-D*: 11 Punkte

* Patients-Health-Questionnaire

C. Rehabilitationsrelevante positiv/negativ wirkende Kontextfaktoren, soweit noch nicht ausgeführt

Persönliches und familiäres Umfeld (z. B. familiäre Unterstützung, Wohnsituation, Beziehungskonflikte, Pflege eines Angehörigen, Tod eines nahe stehenden Angehörigen)

Eheprobleme seit MI, die Ehefrau ist zunehmend gereizt. Sie ist der Meinung, ihr Mann lasse sich zu sehr hängen.

Personal Factors and Familial Environment

Berufliches/schulisches Umfeld (z. B. drohender Arbeitsplatzverlust, Überforderungssituation)

Occupational / Scholastic Environment

Soziales Umfeld (z. B. Unterstützung durch soziale Dienste, sprachliche Verständigungsschwierigkeiten)

Pat. fühlt sich mit der Betreuung des Enkelkinds überfordert

Social Environment

Risikofaktoren

Nikotin Alkoholmissbrauch Übergewicht Bewegungsmangel
Risk Factors
 Drogenmissbrauch/Medikamentenmissbrauch Sonstiges

 Durchschlag zum Verbleib beim Vertragsarzt

Evolution of the Functioning section in ICD-11

1. ICD Concept Title
2. Hierarchy, Type and Use
 - a) Parents
 - b) Type
 - c) Use
3. Textual Definition(s)
 - a) Description (short)
 - b) Definition (long)
4. Terms
 - a) Index Terms
 1. Synonyms
 2. Inclusion Terms
 - b) Exclusion Terms

5. Clinical Description
 - a) Body System(s)
 - b) Body Part(s)[*Anatomical Site(s)*]
 - c) Manifestation Properties
 - a) Signs & Symptoms
 - b) Findings
 - d) Causal Properties
 - e) Etiology Type
 - a) Infection (agents)
 - b) Injury (mechanisms)
 - f) Risk Factors
 - g) Genomic Characteristics
 - h) Temporal Properties
 - i) Severity Properties
 - j) **Functional Properties**
 - k) Specific Condition Properties
 - l) Treatment Properties
 - m) Diagnostic Criteria

- Content model development
- Formation of Functioning TAG
- Initial approach
 - Identify relevant functioning domains for each disease category -> very labour and resource intensive
- Revised approach
 - Identify relevant functioning domains across disease categories -> less labour and resource intensive

Using the Functioning section in ICD-11 – two possibilities

Annex 9

Suggested ICF Data requirements for ideal and minimal health information systems or surveys

Body Functions and Structures	Chapter and code	Classification block or category
Vision	2 8210-8220	Searing and related functions
Hearing	2 8210-8240	Hearing and vestibular functions
Speech	3 8310-8340	Voice and speech functions
Digestion	5 8510-8535	Functions of the digestive system
Bodily excretion	6 8610-8630	Urinary functions
Fertility	6 8640-8670	Genital and reproductive functions
Sexual activity	6 8640	Genital and reproductive health
Skin and disfigurement	8 8810-8830	Skin and related structures
Breathing	8 8440-8460	Functions of the respiratory system
Pain*	2 8280	Pain
Affect*	1 8132-8180	Specific mental functions
Sleep	1 8124	Global mental functions
Energy/vitality	1 8130	Global mental functions
Cognition*	1 8140,8144,8164	Attention, memory and higher-level cognitive functions
Activities and Participation		
Communication	3 4310-4345	Communication receiving – producing
Mobility*	4 4410-4465	Walking and moving
Dexterity	4 4410-4445	Carrying, moving and handling object
Self-care*	5 4510-4570	Self-care
Usual activities*	6 and 8	Domestic life; Major life areas
Interpersonal relations	7 4730-4770	Particular interpersonal relationships
Social functioning	9 4910-4930	Community social and civic life

Annex 9 of the ICF

- V Supplementary section for functioning assessment
- WHODAS 2.0 36-item version

- VB40 Generic functioning domains

Option 1: Structured assessment with WHO-DAS 2.0 allowing to generate an overall and domain specific functioning score

Option 2: Selection of generic functioning domains allowing to generate a functioning profile

Option 1: Structured assessment with WHO-DAS 2.0 recommended

- ▼ V Supplementary section for functioning assessment

- ▼ WHODAS 2.0 36-item version

- ▼ Cognition

- VA00 Attention functions

- VA01 Memory functions

- VA02 Solving problems

- VA03 Basic learning

- VA04 Communicating with - receiving - spoken messages

- VA05 Conversation

- VA0Y Other specified cognition

- VA0Z Cognition, unspecified

- ▶ Mobility

- ▶ Self-care WHODAS

- ▷ Getting along

- ▶ Life activities

- ▶ Participation and impact of health problems

- VA7Y Other specified WHODAS 2.0 36-item version

- VA7Z WHODAS 2.0 36-item version, unspecified

Summary Score

Cognitive Score

6 items

Mobility Score

5 items

Self care Score

4 items

Interpersonal Score

4 items

Life Act. Score

5 items

Participation Score

6 items

Using the Functioning section in ICD-11:

Why structured assessment with WHO-DAS 2.0 recommended?

- Direct link to the International Classification of Functioning, Disability and Health (ICF)
- Cross-cultural comparability
- Psychometric properties
- Ease of use and availability
- Functioning is multidimensional, not an event (i.e. head count pre-defined categories)
- Ease comparability of functioning information across the continuum of care

Domain 2 Mobility

I am now going to ask you about difficulties in [getting around](#).

Show flashcards #1 and #2

In the past 30 days, how much difficulty did you have in:		None	Mild	Moderate	Severe	Extreme or cannot do
D2.1	Standing for long periods such as 30 minutes?	1	2	3	4	5
D2.2	Standing up from sitting down?	1	2	3	4	5
D2.3	Moving around inside your home?	1	2	3	4	5
D2.4	Getting out of your home?	1	2	3	4	5
D2.5	Walking a long distance such as a kilometre [or equivalent]?	1	2	3	4	5

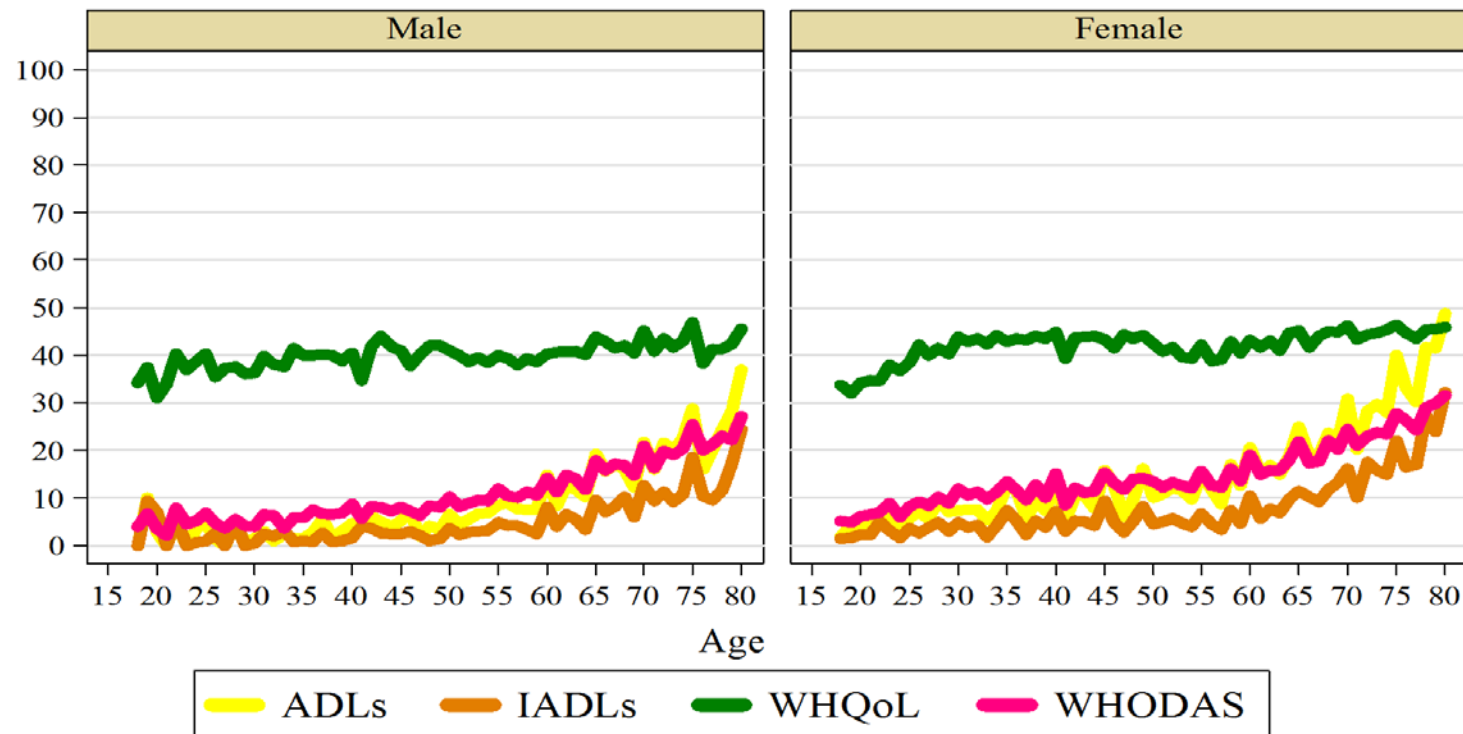

WHO Study on Global Ageing and Adult Health (SAGE)

Conducted in China, Ghana, India, Mexico, Russian Federation and South Africa in 2008-2009

n =45.000

Mean ADLs, IADLs, WHODAS and WHOQoL by age

SAGE Pooled data

Source: SAGE 2009

Option 2: Selection of generic functioning domains

Example

- ▼ V Supplementary section for functioning assessment
 - ▶ WHODAS 2.0 36-item version
 - ▶ Brief Model Disability Survey
- ▼ VB40 Generic functioning domains
 - ▼ Voice and speech functions
 - VB60 Voice and speech related functions
 - ▼ Functions of the cardiovascular, haematological, immunological and respiratory systems
 - VB70 Exercise tolerance functions
 - ▼ Functions of the digestive, metabolic and endocrine systems
 - VB80 Functions related to the digestive system
 - ▼ Genitourinary and reproductive functions
 - VB90 Urination functions
 - VB91 Sexual functions
 - ▶ Neuromusculoskeletal and movement-related functions
 - VB40.5 Functions of the skin and related structures
 - ▼ General tasks and demands
 - VC10 Handling stress and other psychological demands
 - VA23 Carrying out daily routine
 - ▶ Mobility
 - ▶ Self-care
 - ▶ Domestic life
 - ▶ Interpersonal interactions and relationships
 - ▶ Learning and applying knowledge
 - ▶ Communication

Reporting functioning problems related to an adverse event:

8B0Z Intracranial haemorrhage, unspecified

due to PL00 Drugs, medicaments or biological substances associated with injury or harm in therapeutic use with mode of PL13.9 Drug or substance interactions, as mode of injury or harm (XM86W0 Warfarin and XM7Q57 Penicillin (any))

Consequence to patient being:

- VA05 conversation - moderate difficulty
- VA14 walking - moderate difficulty

The Functioning section in ICD-11

Upcoming enhancements & possible future developments

- Upcoming enhancements
 - Reinstate 5-point severity scale
 - More example user guidance in ICD-11 Ref. Guide
 - ICDfit module and interface for ICD-11 functioning section
 - WHODAS 2.0 scoring tool
- Possible future developments
 - Add future WHO DAS 2.0 modules
 - Expand scope: Environmental factors

Why ICD-11 Supplementary section for functioning in ICD-11

- **Need** for standardized & comparable functioning data is increasing. Key drivers incl.
 - Epi transition
 - Ageing societies & increased life expectancy -> how do you live with Health conditions matters more (mee-byo)
 - Big data & technology
- **Enable**
 - **joint use** of ICD & ICF (code once – use multiple times)
 - **coding** of functioning data & **reporting** of coded
 - **standardization** & international **comparability** of functioning data using global public goods
- **Entry point** ICD users to understand the “value proposition” of ICF - **not recreating ICF in ICD.**
